Hold the Airbrush Like an airbrush

Virtual Makeup Brush - Sizes

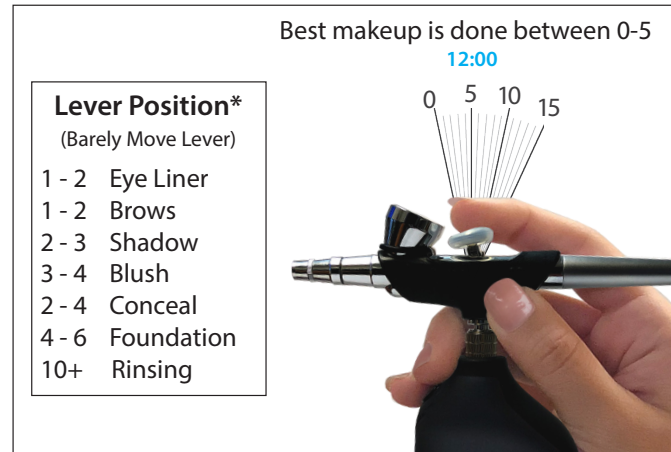

INSTANTLY CHANGE BRUSH SIZES... BY CHANGING AIRBRUSH DISTANCES

- Replaces All Your Traditional Brushes
- Eliminates Brush Cleaning
- Eliminates Brush Contamination
- Faster Application than Traditional Brushes
- Only Air and Makeup Touch the Skin

Makeup Lever Control (Learn this!)

The position of the airbrush lever determines the amount of makeup being released. Suggested positions are based on the nozzle tip being freshly brushed and polished clean.

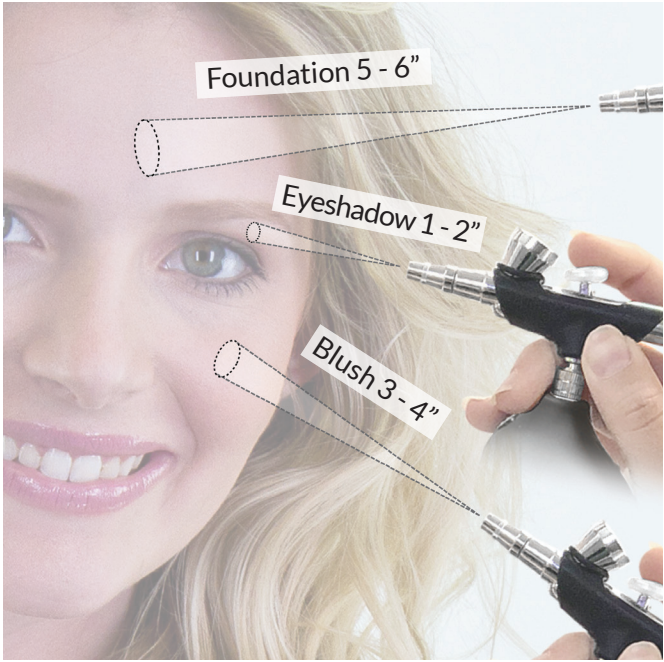

Tanning • Hair Color • Fantasy

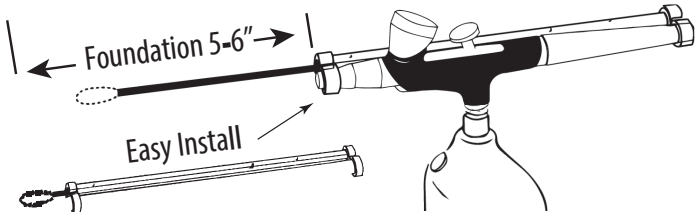

Pick your Brush Size

Practice keeping your airbrush at the same distance. Use water to learn the right distance and motion.

Distance & Brush Size - Practice

Attach Guide to Airbrush for practice exercises.

The Distance Guide will help you to rehearse holding the tip of the airbrush the correct distance from the face. The guide adjusts from about 1" out to 5". Do not touch face with guide tip. Stay about 1/2" from surface.

Listen To Airbrush Sound

Listen to the "light wind" sound of air only. Then as you slightly pull the lever back, you will begin to hear the soft spraying sound of water. Best Dinair makeup is done with the lever barely pulled back. A very light coverage can be repeated several times until the coverage is just right.

Feel the Air

Feel the Warm Air, and the Cool Water.

Try blowing air on your hand or arm at a foundation brush distance. Then pull the lever back slightly until you hear the water sound and you will feel a slight cooling as a very light mist of water is applied. Practice spraying the coverage so lightly that the water evaporates on contact. With practice, a few very light passes of makeup can become a beautiful, natural Dinair makeup coverage.

Deep Clean Spray Tip with Brush

Deep Clean Inside Airbrush

<https://www.airbrushmakeup.com/dailycare/>

BETWEEN USES: PUT ON CLEANING CAPS WITH CLEANER.

Open Bottles and Manage Drops

Shake bottles until you hear sound of mixing balls and continue to shake bottle for 5 to 10 seconds. Pinch bottom of bottle if needed to loosen mixing balls.

FLIP TOP

1. Open Flip Top.
2. Insert a small Pin into the spout.
3. Pierce through the safety seal.

Hold straight Up & Down, (90°) to pour.

DROPPER CAP

- Do not let mixing ball fall into dropper tip.
1. Catch mixing balls on bottle shoulder by keeping bottle at pouring angle of 30°-45°.
 2. Only squeeze bottle gently.
 3. If bottle resists squeezing, tap the of the bottle bottom on a table to dislodge the mixing balls.
